---

Enthusiastic third-year B.E. Computer Science student with a strong passion for front-end development and creating engaging user experiences. Skilled in HTML, CSS, JavaScript, and modern frameworks like React, with a keen eye for design and attention to detail. Adept at transforming ideas into responsive, user-friendly web interfaces. Highly motivated to learn and grow, with strong problem-solving abilities, teamwork, and creativity. Eager to contribute to real-world projects that blend technical precision with aesthetic design to deliver seamless digital experiences.

---

## Experience

2025 – PRESENT

**Student Developer, At A.J. Institute of Engineering and Technology**

Building and designing responsive, user-friendly web interfaces using html, css, JavaScript, and react. Collaborating on academic and personal projects to create clean, visually appealing layouts and improve user experience. Continuously learning modern web technologies, frameworks, and design principles to enhance development efficiency and performance.
